

VALVETTY IN NORTHERN SRI LANKA

Our customer from Valvetty Village in the north of Sri Lanka says “We were struggling with the civil war for last 30 years with no electricity even though we celebrated our village cultural tradition and festivals by putting lights everywhere in the village with hiring generator. We spent lots of money for hiring. Our ambition was buying a new generator so we researched on the internet and found FG Wilson is the best choice for us. We simply say “Our dream come true”.

The generator sales team at Stuart Group recommended a new [P110-3](#) in a sound attenuated canopy and arranged door to door delivery to the village. Delighted with their purchase and the way their “thousands of questions” were answered, the customer described us as “perfect”.

The FG Wilson local dealer is now in contact with them, and has visited to give the villagers a free training course on the operation of the generator. The community is now preparing for an opening ceremony next month.
